

# Report Template

Cole Brookson

10/24/2021

Using clearly labeled headers and sub-headers if necessary, outline the major sections, as described in the assignment handout.

## A few tips:

- 1 . To make simple tables (preferable to screenshots for smaller tables), use the following syntax:

header 1	header 2	header 3
x		y

2. To keep your code from displaying in your markdown, use `echo = FALSE` in your code chunk like as follows:

```
## [1] 5
```
